TOP SECRET TTTT

REFERENCE: MISSION 1043

1. AN ANOMALY OCCURRED IN THE SCAN RATE OF THE FORWARD CAMERA (NO. 200) FIRST NOTICED IN PASS 68 AND INCREASING TO 40 PERCENT IN THE MIDDLE OF 1043-2. THE SCAN RATE VARIED OVER THE FRAME WITH THE GREATER ERROR AT THE SUPPLY END.

2. BECAUSE OF THE ERRONEOUS SCAN RATE, IMAGE SMEAR IS EVIDENT.

3. MENSURATION SHOULD BE MADE FROM THE AFT CAMERA AS THE VARYING SCAN RATE OF THE FORWARD CAMERA WILL SERIOUSLY AFFECT MEASUREMENTS MADE THEREFROM.

4. ON PASS 120 THE SCAN RATE WAS INCORRECT FOR BOTH THE AFT AND FORWARD CAMERAS, THEREFOR MEASUREMENT ACCURACY WILL BE AFFECTED.
